

BIRLA INSTITUTE OF TECHNOLOGY & SCIENCE (BITS) PILANI PRACTICE SCHOOL DIVISION

STUDENT BIO-DATA FOR PRACTICE SCHOOL

Name: MELLIMPUDI TEJAS .

Email: F20230802@HYDERABAD.BITS-PILANI.AC.IN

Student Id: 2023B5A70802H

Program: M.Sc. Physics, B.E. Computer Science

CGPA: 8.58

DOB: 03-08-2006

Pan #: HAJPM3493P

Aadhar #: 238664584365

Phone: 6300705341

Address: E7-12 PULICAT NAGAR, SHAR ROAD, SULLURUPETA
SULLURUPETA, Andhra Pradesh, India, 524121

Academic Credentials (On-campus Courses)

S No	Course Name	Grade
1	BIOLOGY LABORATORY	A-
2	CLASSICAL MECHANICS	B
3	ELEC MAGNET & OPTICS LAB	A
4	ELECTROMAGNETIC THEO I	A-
5	ENGINEERING GRAPHICS	A-
6	ENVIRONMENTAL STUDIES	GD
7	GENERAL CHEMISTRY	A
8	MAIN TRENDS IN IND HIST	CR
9	MATHEMATICS I	A-
10	MATHEMATICS III	A-
11	MOD POLITICAL CONCEPTS	CR
12	OPTICS	B-
13	PRINCIPLES OF ECONOMICS	CR
14	QUANTUM MECHANICS I	CR
15	THERMODYNAMICS	A-

S No	Course Name	Grade
16	CHEMISTRY LABORATORY	A-
17	COMPUTER PROGRAMMING	B
18	ELECTRICAL SCIENCES	A-
19	ELECTROMAGNETIC THEO II	CR
20	ENVIRON DEV & CLIMATE CH	B-
21	GENERAL BIOLOGY	A
22	INTRO TO ASTRO & ASTROPH	CR
23	MATH METHOD OF PHYSICS	CR
24	MATHEMATICS II	B-
25	MECH OSCILLATIONS & WAVE	A-
26	MODERN PHYSICS LAB	CR
27	PHYSICS LABORATORY	A
28	PROBABILITY & STATISTICS	B-
29	TECHNICAL REPORT WRITING	B
30	WORKSHOP PRACTICE	A

On-campus projects/other projects

- I've actively pursued hands-on projects both on campus and independently
- leveraging my skills in programming and electronics to explore innovative solutions. As a member of the Robotics Club (ARC)
- I contributed to designing and building robots for competitions

- including a monster robowar bot and a line-following bot. My role in the electronics department involved coding in C++ for Arduino
- wiring circuits
- and troubleshooting hardware
- enhancing my engineering and problem-solving abilities. I also assisted in managing workshops during campus fests
- sharing technical knowledge with peers. Additionally
- I regularly tackle coding challenges on platforms like LeetCode and Codeforces
- creating mini-programs in Python
- C++
- and JavaScript to refine my algorithmic thinking. These projects whether on-campus collaborations or self-driven experiments reflect my passion for blending creativity and technology to solve real-world problems.

Software & Programming Skills

- 1. Web Development: Languages: HTML
- CSS
- JavaScript
- Duration: from 2024
- Details: Built websites or web applications (e.g. personal projects
- college assignments).
- 2. Learned python language
- its modules
- OOPS
- made small GUI apps and many.
- 2. Data Science: Duration: october 2024
- Details: Worked on data analysis and EDA
- visualization
- and small projects (e.g. using libraries like Pandas or Matplotlib).
- 3. Arduino Projects: Language: C++
- Duration: jan 2024
- Details: Created hardware projects (e.g. sensors
- robots
- or gadgets) using Arduino.
- 4. I have also developed skills in designing rockets in open rocket and open motor software and also learned physics related to rocket and aerospace.
- 5. Platforms: Codeforces
- LeetCode
- Replit
- github.
- 6. Recently after exam i have started learning django and backned development and currently making a e-commerce website.

Co-Curricular Activities

- 1.Cricket Team: Role: ALL-ROUNDER
- Duration:september 2023- present
- Description:Competed in matches and honed teamwork
- strategic thinking.
- 2.Teacher Assistance: Role:Assistant
- Duration: January 2025 – Present
- Description: Supported teachers with classroom tasks
- conducting tests
- management of records.
- 3.Robotics Club (ARC): Role: electronic department member
- Duration: September 2023 – present
- Description: Designed and built robots
- gaining hands-on experience in programming
- engineering
- and problem-solving.Made monster robowar bot
- line following bot and helped in management of workshop during fests.
- 4.Spectrum Club (Physics Department): Role: R&D Member
- Duration: September 2023 – present
- Description: Conducted physics experiments and research theories
- .Vanguard Club (Mars Rover Team): Role: rover electronics team
- Duration: November 2024 –Present
- Description:Designing a Mars rover prototype
- making electric circuit boards and electronics of rover.

Extra Curricular Activities

- I actively engage in a variety of extracurricular pursuits that reflect my interests in sports
- technology
- and personal growth. One of my favorite activities is playing cricket.I'm passionate about technology and spend time tinkering with AI sites and electronics.I experiment with platforms like Replit and explore Arduino-based projects
- building small prototypes such as sensor-driven gadgets.Similarly
- I challenge myself by solving small coding problems on sites like Codeforces and LeetCode
- sharpening my proficiency in Python
- C++
- and JavaScript.
- To unwind and broaden my perspective
- I enjoy watching tech podcasts
- movies
- and web-series. From science fiction films that spark my imagination to coding-related podcasts that deepen my understanding of tech trends
- these activities have been a constant since childhood
- fueling my curiosity and inspiring my projects.Together

- they shaped me into a well-rounded individual eager to learn
- collaborate
- and innovate.

Professional Interest

- My professional interests lie at the intersection of technology
- innovation and problem-solving
- with a strong focus on leveraging programming and electronics to create impactful solutions. From an early age
- I've been fascinated by how software and hardware can work together to address real-world challenges
- whether it's designing a website that enhances user experience
- analyzing data to uncover meaningful insights or building a physical prototype that automates a task.
- Ultimately
- my professional interest is to become a versatile technologist who bridges software and hardware to innovate across industries. I'm motivated by the rapid evolution of technology and the endless opportunities it offers to learn and grow. Through this practice school experience
- I hope to gain practical exposure to real-world projects
- refine my technical abilities
- and collaborate with peers who share my enthusiasm. I'm committed to pursuing a career that lets me explore
- create
- and contribute to a technology.

Objective of Pursuing Practice School

My objective in pursuing Practice School is to bridge the gap between theoretical knowledge and practical application, transforming my academic skills into real-world expertise.

Practice School offers a unique opportunity to apply these skills in a professional setting, enhancing my technical proficiency and exposing me to industry-standard tools, workflows, and challenges. I aim to gain hands-on experience in collaborative projects that mirror real-world scenarios, such as developing functional websites, analyzing complex datasets, or designing innovative hardware solutions. Practice School will allow me to refine these abilities under expert guidance, learning to integrate software and hardware seamlessly while adapting to deadlines and teamwork dynamics. This experience will not only solidify my technical foundation but also help me identify my career path.

Any other information

- Growing up in Sriharikota
- I've been surrounded by the awe-inspiring world of rockets and space exploration since childhood and watched many rocket launches. Those moments ignited a deep curiosity

and passion for propelling me toward physics

- rocket technology
- and aerospace. This curiosity naturally extended to my academic pursuits
- where I gravitated toward physics to decode the laws governing motion and energy
- and later to tinkering with electronics and coding to build small prototypes. Beyond my technical pursuits
- I have a deep curiosity and passion for movies and short films
- which enrich my perspective and fuel my creativity. This interest goes beyond casual viewing I'm fascinated by the art of storytelling
- cinematography
- and the innovative ways filmmakers convey complex ideas in concise formats. I've spent countless hours exploring genres like science fiction
- drama
- and experimental works
- drawn to how they blend visuals
- sound
- and narrative to inspire and provoke thoughts.
